De-Foam

Foam Suppressor

“Formulated to rapidly break up foam, to maximize the performance of your equipment. It prevents foam from forming in wands and hoses. An excellent additive for parts washing machines.”

FEATURES AND BENEFITS

Environmentally Friendly: A.P.E. free.

Quickly breaks down foam: Allows recovery tanks to be completely utilized; reduces time spent on emptying.

Versatile: Efficient in acidic or alkaline solutions; excellent performance at any temperature.

Ready-to-use: Can be used with autoscrubbers, wet pick-up vacuums and extractors.

Economical: Only a small amount is necessary.

WHERE TO USE

DE-FOAM is efficient in both highly acidic and high alkaline solutions, hot and cold foaming systems, automatic scrubbers, wet pick-up vacuums, steam/water extraction equipment, etc.

HOW TO USE

Do not spray directly on carpet or floor.

Carpet extractor: For best results, before starting the water extraction procedure, use the vacuum hose to suction 28-85 ml (1-3 oz) of solution into the recovery tank. De-Foam can also be added directly into the recovery tank. Additional De-Foam may be added during the procedure as required.

Auto-scrubber/wet vacuum: Spray inside the tank and/or directly into vacuum hose before starting pick-up.

Parts washing: Add 28-85 ml (1-3 oz) to the solution reservoir.
