

New Labels – Chemical Line

Same products, same prices – Great new look!

Dear Valued Partners,

The Dustbane team is happy to announce the rollout of new labelling for all Dustbane Chemicals, beginning September 2, 2014. The new labels, made of chemical resistant material, have been redesigned with a modern, eye catching look. The product information found on the labels has been standardized and is presented in a more comprehensive format.

Included in this redesign, is the long overdue update of our workplace labels. In the interest of user safety, we have added safety and handling elements, going above and beyond Health Canada labelling regulations, all while refreshing the design to follow the new look.

A few other important changes:

Name Change – Removing 2000

- Cross-Link
- CSQ
- Expo
- Nu-Life
- Power Kleen

Re-Categorization of Products

Power Lift & Orang-a-Tang– grey to orange (Specialty products to Degreaser)
Maximum & Dynamite - grey to yellow (Specialty products to Stripper)

* These changes also affect the MSDS sheets – you can find the updated documents on our website www.dustbane.ca.

Please note that it will be important to rotate your stock as you receive the products with the new labels, as we cannot accept returns or exchanges of products with old labels. To assist you with this, for the next few months all boxes with the new look labels will be identified with a sticker. →

Our old look has served us well for many years, but it is time for an update. We hope that this new look will help reinvigorate your Dustbane experience.

Thank you for your continued support of Dustbane Products,

Marc Galarneau
Senior Vice-President

New Workplace Labels

Packaging boxes with the new label will be identified with this sticker.
