

The Importance of Site Surveys

And how your facility can benefit from one!

A Site Survey is our way of addressing our customers' needs through a top to bottom assessment of their facility, as well as their current cleaning processes, needs, goals, budget, and more.

Why we conduct Site Surveys

A Site Survey is about more than just buying a product. It's about using the right products for your facility. A bottle of a common disinfectant purchased at a retail store does the same job for everyone who uses it. Now picture a disinfectant that has specific characteristics that make it more effective against your unique needs. The Site Survey is designed to help you find that disinfectant, among many other things. Our years of expertise in the industry have given us a full understanding of different environments and how to tackle their daily cleaning challenges effectively and successfully. We know what works and what doesn't.

What is assessed during a Site Survey

During the site survey, many factors are taken into account:

- Areas to be cleaned and maintained
- Current process & methods for cleaning and maintenance
- Current chemical usage, storage, and disposal
- Goals for continuous improvement
- Consolidation & SKU rationalization opportunities
- Current safety and sustainability programs

How Our Customers Benefit From A Site Survey

Finding the best products is just half of the Site Survey. The other half includes the three most important pieces:

- Significant hard cost savings
- Labour and productivity savings
- Health & safety and environmental reasons to change

These key factors are what give customers a quick return on their investment and a comprehensive cleaning program that addresses all of those areas.

Our Site Surveys are available virtually or in person at no cost.

To request a Site Survey, email us at info@dustbane.ca or call us at 1-800-387-8226.

Before

After

The 5s: Sort, Set In Order, Shine, Standardize, and Sustain

The Site Survey allows businesses to increase health and safety awareness within the facility. Our experts are able to provide customers with an organized cleaning program that meets modernized and essential health and safety requirements using these tactics:

Sort: Decluttering your space by removing products that are expired, have improper labelling, or are ineffective.

Set In Order: Create a more spacious environment where there's a place for everything and everything is in its' place.

Shine: A well-established organization comes from within. Using the Site Survey, your company image will ultimately improve.

Standardize: Having an organized, consistent cleaning program in place will increase productivity and provide a safer space for all employees.

Sustain: Consistency is key to avoid detrimental mistakes or workplace hazards. Using our "Train The Trainer" philosophy, our Site Survey will customize a program that all employees can adapt to and support throughout the company.
