

# Dustbane

Sweep away dirt and dust!

## About this product

Dustbane Sweeping Compound has been our signature product since early 1908. Its efficiency has allowed it to withstand the test of time. Using sweeping compound before sweeping prevents dust and dirt from becoming airborne and resettling while cleaning. Sweeping compound works by trapping dust particles and dirt so they cannot escape until you have a chance to sweep them up.

- 100% biodegradable
- Contains natural ingredients such as sawdust and sand
- Contains no petroleum or hazardous components
- Prevents the inhalation of irritable dust while sweeping
- Great absorbency, making it ideal to clean up spills
- Suitable for all type of flooring
- Picks up dirt and dust without leaving an oily residue
- CFIA approved

## A sustainable solution

Our sweeping compound is made from top-quality recycled materials, contains no petroleum ingredients and is 100% biodegradable, making it safe to use.

## New packaging

From this...

...to this!

Our new containers are made of recycled plastic from Ontario's Blue Box Program. Once empty, the container is a very useful waste receptacle or storage container.

## Easy to use

A little goes a long way! Sprinkle a thin line across the starting point of the surface to clean, then sweep. It is not necessary or recommended to cover the entire floor with the compound. Sweep immediately after applying as floors could become slippery if applied for extended periods of time.
