

Bio-Bac II

The product that keeps working

About this product

Bio-Bac II has got your back! This multi-purpose cleaner, powered by enzymes, keeps working even after the initial application. It eliminates the toughest stains and odours and prevents them from coming back. It offers unparalleled performance for cleaning all types of organic soils, from greasy kitchen floor to urine stained washroom surfaces. It cleans, degreases and deodorizes the surfaces quickly and efficiently. Unlike regular detergents, Bio-Bac II does not push grease and dirt around, but deep cleans the surfaces by destroying organic matter, for a better clean.

- 400% more bacillus for better results
- Does not contain harsh chemicals or solvents
- Cleans, degreases and deodorizes
- Sustainable solution, fully biodegradable
- Breaks down matter and grease
- Safely cleans clogged drains
- Deodorizes by attacking the organic source of odours

Parts cleaning	1:40 - 1:80

Powered by tiny “pacmans”

Bio-based cleaners work by eating away the organic matter – think of them like little pacmans. The bacillus keep working until all the organic matter is completely destroyed. Bacillus cleaners are an ideal choice for hard surfaces where organic soils accumulate. They clean without leaving any residues. Get peace of mind of knowing that you are using a safe, non-toxic, ECOLOGO Certified product.
