Light Duty Cleaning	1:160
Auto-scrubber	1:160
Normal Cleaning	1:120
Sealed Hard Wood Floor	1:120
Heavy Duty Cleaning	1:80

How to restore a floor using a floor maintainer

Restoring a floor finish can be done using different methods. For quick maintenance, diluting Restore and applying it using a mop will bring quick and easy results. Repairing a damaged floor finish can be done using the spray buffing method where you dilute Restore at 1:4 with water and spray a small amount onto the floor. Pass over this area 3 or 4 times with the Integra floor machine and a red pad and voilà, your floor will look like new!
