

Touchless Soap Dispenser

Hands-Free Soap & Sanitizer Dispensing

About this product

The Touchless 1000ML Dispenser System delivers reliable, hands-free hygiene for facilities that prioritize cleanliness, safety, and efficiency. Designed for flexibility, it accommodates foam soap, lotion soap, and liquid hand sanitizer with interchangeable internal pumps. The refillable 1000ML bottle and replaceable internal parts extend the unit's service life while keeping costs under control.

Durable, modern, and easy to maintain, this dispenser reduces cross-contamination and ensures consistent product delivery in high-traffic environments.

- **Touch-Free Operation:** Automatic sensor-activated dispensing minimizes contact, supporting infection control.
- **Modular Pump System:** Switch between foam, lotion, or sanitizer pumps without replacing the entire unit.
- **Refillable Bottle System:** Includes a 1000ML refillable, replaceable bottle for long-term use.
- **Interchangeable Internal Parts:** Replace pumps and bottles as needed, extending dispenser lifespan.
- **Controlled Dispensing:** Consistent doses of 0.4ML or 0.8ML reduce waste and manage cost per use.
- **Modern Wall-Mount Design:** Sleek and professional for front- and back-of-house settings.
- **Battery Operated:** Cord-free installation with long-lasting battery power (batteries not included).
