

ModularFlex System

4 products, countless opportunities!

About this product

Proper cleaning starts with proper dilution. Up to 4 chemicals can be housed within the unit. It accommodates 2 litre bottles. Your chemicals are stored behind locked enclosures to protect both the users and your brand. It allows for safe manipulation of the chemicals by preventing any leaks or direct contact. The ModularFlex System can be the central hub for all cleaning activities within a building.

E-Gap

E-Gap educators provide backflow protection through the use of an elastomeric sleeve.

Cost Effective

Dilution control is the best form of cost-effective use of chemical concentrates. Diluting your own chemicals is less costly than buying ready-to-use products.

Accuracy Matters

Patented Pressure Regulation Technology comes standard with the ModularFlex System. This technology eliminates dilution variance to consistently dispense the precise amount of chemicals regardless of water pressure.

- Rite-Connect closed-loop system compatible
- 1-5 GPM flow rate options
- Uses less space than dispenser + separate chemicals
- High-quality dispenser stands up to daily wear and tear
- Cabinets with steel locking device
- New, expansive workspace to easily route tubes
- Easy, tool-free maintenance
- Easy to install with the use of a mounting bracket
- Chemical resistant select valve

Set a New Standard

The all-in-one system has the quickest installation and setup time in the industry. It has an intuitive, user friendly design that users will appreciate.
