

Touchless Soap Dispenser

Modernized, worry-free hand cleaning

About this product

Soap dispensers in public restrooms with a “push” mechanism are a haven for bacteria. Hundreds of people use them every day in high-traffic areas, which only increases the need for them to be wiped down after use. With the continuously increasing demand for more sanitary hand hygiene procedures, Dustbane is excited to offer a touchless soap dispenser with a sleek look to complement any decor in any facility. Its’ durable material and easy-to-install build makes it the perfect alternative for traditional soap dispensers. Available in separate foaming, lotion and spray formats.

- Automatic – hands-free operation
- Reduces cross-contamination by eliminating the physical contact with dispenser
- Dispenses a perfect and consistent amount of soap
- Lockable to deter theft and tampering
- Operates on batteries (not included)
- Can be mounted on the wall using the provided hardware or using the durable stickers for a damage-free and easy installation (included)
- Cost effective – get up to 2,500 handwashes on a full reservoir
- On/off switch to prevent accidental dispensing during refill
- Transparent window allows you to refill soap in time
- Compatible with liquid hand sanitizer

Need the soap to go with it?

Our ECOLOGO® certified hand cleaners, Tradition and Tradition Plus offer a rich lathering, mild formula that leaves hands feeling smooth and soft. Their deep cleaning properties and unscented formula make them the perfect product to use with any refillable soap dispenser.
