

Touchless Soap Dispenser

Battery operated automatic touchless dispenser

Applications:

An easy to fill, touchless soap dispenser. Its stylish design fits to any decor while remaining a safe alternative to traditional soap dispensers by eliminating physical contact with the unit. The touchless automatic sensor automatically eject mist when your hand is 1-4 inch away from the outlet, avoiding spread of bacteria caused by contact.

Benefits:

- Automatic– hands-free operation
- Reduces cross-contamination
- Encourages proper hand hygiene by making soap easily accessible
- Produces consistent volume with every use
- Made of tough, durable plastic
- Lockable to deter theft and tampering
- Operates on batteries (*not included*)
- Reliable battery life – good for up to 30,000 handwashes
- Can be mounted on the wall using the provided hardware or using the durable stickers for a damage-free and easy installation (*included*)
