

Integra TX UHS

Integra Series

Ultra High Speed Polisher

Easy to Operate

Its rotationally molded base reduces noise, increases stability and is extremely durable. This polyethylene base has a pebbled surface, impervious to chemicals. Designed to offer the maximum comfort throughout the operation. The simple two-finger operation reduces operator fatigue. This two-piece retrofit assembly is easy to replace.

Creates Protective Coating

Using the Integra TX UHS floor polisher will also create a protective coating for the floor, when used with an appropriate floor maintenance product. The ultra high speed action causes the ingredients in a floor maintainer to bond together to form a new surface. The result is a spotlessly clean floor with exceptional shine.

Floor Pads
