

Designed for the most extreme stripping applications

Extreme Stripping Pad

Superior Chemical Resistance

Designed to work in conjunction with floor stripping solutions, the Titan Extreme floor pad displays superior chemical resistance versus the competitive pad. Boasting a unique design that allows for the stripping solution to flow through the floor pad and rinse out dirt to maximize the pad-to-floor contact throughout its use.

Superior Stripping Performance

Titan Extreme is by far our most aggressive stripping pad – consistently outperforming the standard black stripping pads by removing floor finish and sealers faster while performing more effectively on tough, heavily compacted finishes. Titan Extreme will stand up to even the toughest jobs!

Built To Last

With its open texture non-woven fabrication, the Titan Extreme is constructed to be durable and offer consistent performance. Abrasive particles are distributed throughout the pad and adhered to the non-woven construction with a sturdy adhesive.

Specifications	Titan Extreme
Available Sizes	10" to 20", 24"
Application	Wet
Machine Speed	Up to 350 rpm (Rotary machines) / 2,400 rpm (Oscillating machines)
Thickness	0.71" (18 mm)
Fiber Type	Recycled Polyester
Colour	Dark Grey
Recycled Content	Yes – Made of 100% recycled polyester fibers
Pack	5 per case

For fast removal of finish..
